management conference.

**Design and construction details  
for successful biocontainment  
facilities projects**

**Biocontainment Facilities 2003  
May 5-6, 2003, Hilton Head, SC**

This conference takes the next step beyond Tradeline's successful 2002 biocontainment facilities conference. It examines newly emerging best practices on such details as space plans, control systems, system redundancy and risk quantification, air handling and filtration methods, the selection of hardware and materials, waste disposal, security and biosecurity, facility commissioning strategies, decontamination, and the modeling of construction and operational costs.
