

Biosafety Listings

Editor's Note

The following Biosafety Listings are obtained from the Health Canada's Office of Laboratory Security web site at www.hc-sc.gc.ca/pphb-dgsp/ols-bsl/qbl-ltb/index.html.

- Alfa, M. J., Olson, N., DeGagne, P., & Jackson, M. (2002). Evaluation of rapid readout biological indicators for 132 degrees C gravity and 132 degrees C vacuum-assisted steam sterilization cycles using a new automated fluorescent reader. *Infection Control Hospital Epidemiology*, 23, 388-392.
- Barden, L. S., Delany, J. R., Glenn, S., Perry, S. R., Lipman, H., Escott, S. H., et al. (2002). Training laboratory personnel to identify the agents of bioterrorism. *Laboratory Medicine*, 33, 699-703.
- Baon, E. J. (2002). Speculations on the microbiology laboratory of the future. *Clinical Infectious Diseases*, (Suppl 1), S84-S87.
- Bell, C. A., Uhl, J. R., Hadfield, T. L., David, J. C., Meyer, R. F., Smith, T. F., et al. (2002). Detection of *Bacillus anthracis* DNA by LightCycler PCR. *Journal of Clinical Microbiology*, 2897-2902.
- Bonn, D. (2002). Scientists join small pox vaccine controversy. *Lancet*, 2, 515.
- Bryskier, A. (2002). *Bacillus anthracis* and antibacterial agents. *Clinical Microbiology and Infection*, 8, 467-478.
- Casadevall, A. (2002). Passive antibody administration (immediate immunity) as a specific defense against biological weapons. *Emerging Infectious Diseases*, 8, 833-841.
- Casagrande, R. (2002). Biological warfare targeted at livestock. *Bioscience*, 52, 577-581.
- Check, E. (2002). Poliovirus advance sparks fears of data curbs. *Nature*, 418, 265.
- Couzin, J. (2002). Virology. Active poliovirus baked from scratch. *Science*, 297, 174-175.
- Coszin, J. (2002). Bioterrorism. A call for restraint on biological data. *Science*, 297, 174-175.
- Edwards, S. F. (2002). The condition of high containment laboratory HEPA filters after 13 years of service. *Applied Biosafety: Journal of the American Biological Safety Association*, 7(2), 64-73.
- Enochs, B. J., Conner, T. H., Emery, R., & Whitehead, L. W. (2002). An Evaluation of potential liquid/aerosol releases from a new retractable syringe. *Applied Biosafety: Journal of the American Biological Safety Association*, 7(2), 74-81.
- Espy, M. J., Uhl, J. R., Sloan, L. M., Rosenblatt, J. E., Cockerill, F. R., & Smith, T. F. (2002). Detection of vaccinia virus, herpes simplex virus, varicella-zoster virus, and *Bacillus anthracis* DNA by LightCycler polymerase chain reaction after autoclaving: implications for biosafety of bioterrorism agents. *Mayo Clinic Proceedings*, 77, 624-628.
- Gebel, J., Sonntag, H. G., Werner, H. P., Vacata, H., Exner, M., & Kistemann, T. (2002). The higher disinfectant resistance of nosocomial isolates of *Klebsiella oxytoca*: How reliable are indicator organisms in disinfectant testing? *Journal of Hospital Infection*, 50, 309-311.

- Girou, E., Loyeau, S., Legtand, P., Oppein, F., & Brun-Buisson, C. (2002). Efficacy of handrubbing with alcohol based solution versus standard hand-washing with antiseptic soap: randomised clinical trial. *British Medical Journal*, 325, 362.
- Holdstock, D. (2002). Biological weapons: the facts not the fiction. *Clinical Medicine*, 2, 80-81.
- Jornitz, M. W., & Meltzer, T. H. (2002). The mechanics of removing organisms by filtration: the importance of theory. *Medical Device Technology*, 13, 14-18.
- Kaempfer, R., Arad, G., Levy, R., & Hillman, D. (2002). Defense against warfare with superantigen toxins. *Israeli Medical Association Journal*, 4, 520-523.
- Le Blanc Smith, P. M., Nguyen, S. V., & Edwards, S. F. (2002). Biological testing of a laboratory pathological waste incinerator. *Applied Biosafety: Journal of the American Biological Safety Association*, 7(2), 52-63.
- Lofstedt, R. (2002). Good and bad examples of siting and building biosafety level 4 laboratories: a study of Winnipeg, Galveston and Etobicoke. *Journal of Hazardous Material*, 52, 74-76.
- Lopez, L., Romero, J., & Ureta, F. (2002). In vitro germicide action of disinfectant products used in the food industry. *Archivos Latinoamericanos de Nutricion*, 52, 74-76.
- Luppens, S. B. I., Reij, M. W., van der Heijden, R. P., Rombouts, F. M., & Abee, T. (2002). Development of a standard test to assess the resistance of *Staphylococcus aureus* biofilm cells to disinfectants. *Applied and Environmental Microbiology*, 68, 4194-4200.
- Mata-Portuguez, V. H., Perez, L. S., & Acosta-Cio, E. (2002). Sterilization of heat-resistant instruments with infrared radiation. *Infection Control and Hospital Epidemiology*, 2, 393-396.
- Melly, E., Genest, P. C., Gilmore, M. E., Little, S., Popham, D. L., Driks, A., et al. (2002). Analysis of the properties of spores of *Bacillus subtilis* prepared at different temperatures. *Journal of Applied Microbiology*, 92, 1105-1115.
- Metcalfe, N. (2002). A short history of biological warfare. *Medicine, Conflict and Survival*, 18, 281-282.
- Montville, R., Chen, Y., & Schaffner, D. W. (2002). Risk assessment of hand washing efficacy using literature and experimental data. *International Journal of Food Microbiology*, 73, 305-313.
- Monero, J. D. (2002). Bioethics after the terror. *American Journal of Bioethics*, 2, 60-64.
- Nakajima, N. & Horinouchi, T. (2002). Ozone generator for small capacity ozone generation by using a ceramic transformer. *Ozone-Science & Engineering*, 24, 215-219.
- Nowakowski, A., Wang, C., Powers, D. B., Amersdorfer, P., Smith, T. J., Montgomery, V. A., et al. (2002). Potent neutralization of botulinum neurotoxin by recombinant oligoclonal antibody. *Proceedings of the National Academy of Sciences USA*, 99, 11346-11350.
- Omokhodion, F. O. (2002). Health and safety of laboratory science students in Ibadan, Nigeria. *J. R. Soc. Health*, 122, 118-121.
- Phillpotts, R. J., Jones, L. D., & Howard, S. C. (2002). Monoclonal antibody protects mice against infection and disease when given either before or up to 24 h after airborne challenge with virulent Venezuelan equine encephalitis virus. *Vaccine*, 20, 1497-1504.
- Proctor, R. A. (2002). The USA preparing for bioterrorism: The role of Fort Detrick since 1970. *World Medical Journal*, 101, 20-24.
- Raber, E., & McGuire, R. (2002). Oxidative decontamination of chemical and biological warfare agents using L-Gel. *Journal of Hazardous Materials*, 93, 339-352.

Rikimaru, T., Kondo, M., Kajimura, K., Hashimoto, K., Oyamada, K., Miyazaki, S., et al. (2002). Efficacy of common antiseptics against multidrug-resistant Mycobacterium tuberculosis. *International Journal of Tuberculosis and Lung Disease*, 6, 763-770.

Rikimaru, T., Kondo, M., Kajimura, K., Hashimoto, K., Oyamada, K., Sagawa, K., et al. (2002). Bactericidal activities of commonly used antiseptics against multidrug-resistant Mycobacterium tuberculosis. *Dermatology*, 204 (Suppl 1), 15-20.

Roos, K. L., & Eckerman, N. L. (2002). The smallpox vaccine and postvaccinal encephalitis. *Semin. Neurol.*, 22, 95-98.

Schuch, R., Nelson, D., & Fischetti, V. A. (2002). A bacteriolytic agent that detects and kills Bacillus anthracis. *Nature*, 418, 884-889.

Serp, R., von Stockar, U., & Marison, I. W. (2002). Immobilized bacterial spores for use as bioindicators in the validation of thermal sterilization processes. *Journal of Food Protection*, 325, 75-76.

Taylor, D. (2002). Inactivation of the BSE agent. *C. R. Acad. Sci. III*, 325, 75-76.

van Engelenburg, F. A. C., Terpstra, F. G., Schuitemaker, H., & Moorer, W. R. (2002). The virucidal spectrum of a high concentration alcohol mixture. *Journal of Hospital Infection*, 51, 121-125.

Wennborg, H., Bonde, J. P., Stenbeck, M., & Olsen, J. (2002). Adverse reproduction outcomes among employees working in biomedical research laboratories. *Scandinavian Journal of Work Environment and Health*, 28, 5-11.

Wheelis, M., Casagrande, R., & Madden, L. V. (2002). Biological attack on agriculture: Low-tech, high-impact bioterrorism. *Bioscience*, 52, 569-576.

Yang, S., Lin, S., Kelen, G. D., Quinn, T. C., Dick, J. D., Gaydos, C. A., et al. (2002). Quantitative multiprobe PCR assay for simultaneous detection and identification to species level of bacterial pathogens. *Journal of Clinical Microbiology*, 40, 3449-3454.

IMPORTANT..... IMPORTANT..... IMPORTANT..... IMPORTANT

A change of address notice should be sent at least 6 weeks in advance to the ABSA National Office to ensure that all mailings, including the journal, will reach you. ABSA is not responsible for misrouted mail as a result of insufficient notification of an address change. Undelivered copies resulting from an insufficient address change notification will not be replaced, but single issues may be purchased at the single issue price.
