### **Join a Committee**

Have you ever considered joining a committee? When you choose to serve on a volunteer committee, you open up a world of possibilities for networking, professional growth, and career opportunities while serving your profession. Volunteer member groups are the backbone of the association because they:

- Serve as a forum for exchange of information
- Advance the science in all specialties of biosafety
- Develop guidelines and standards
- Provide education and training
- Link ABSA to many other institutions

You should explore committees in areas of the profession where you are active or have an interest. There is a great variety; you can be sure to find one of interest to you. Please review the list of committees and identify those areas in which you would like to participate or contact the chair of the committee (<http://www.absa.org/abocommittees.html>) that interests you to find out more information about the committee's goals. You are also invited to attend the committee's meeting during our national conference or at any other time (all committee meetings are open).
