Join a Committee

Have you ever considered joining a committee? When you choose to serve on a volunteer committee, you open up a world of possibilities for networking, professional growth, and career opportunities while serving your profession. Volunteer member groups are the backbone of the association because they: serve as a forum for exchange of information; advance the science in all specialties of biosafety; develop guidelines and standards; provide education and training; and link ABSA to many other institutions.

You should explore committees in areas of the profession where you are active or have an interest. There is a great variety; you can be sure to find one of interest to you. Please review the list of committees and identify those areas in which you would like to participate or contact the chair of the committee (www.absa.org/abocommittees.html) that interests you to find out more information about the committee's goals. You are also invited to attend the committee's meeting during our annual conference or at any other time (all committee meetings are open).

Online Journal Submission Site

Applied Biosafety: Journal of the American Biological Safety Association is a peer-reviewed, scientific journal committed to promoting global biosafety awareness and best practices to prevent occupational exposures and adverse environmental impacts related to biohazardous releases. The goal of *Applied Biosafety* is to provide a forum to exchange and promote sound biosafety and biosecurity initiatives through the publication of new research in biosafety, as well as information on best biosafety practices, policy issues and position papers, editorials, commentaries, and reviews.

The new online submission site for *Applied Biosafety* is user-friendly and available at www.x-cd.com/absa/article.cfm. If you have any questions, please contact the Production Editor, Karen Savage, at the ABSA Office at 1-866-425-1385 (toll free) or 847-949-1517 or via e-mail at karen@absa.org.
